

Application for Water Quality and Profitability Analysis

The Polk County Soil and Water Conservation District (SWCD) helps farmers and landowners make the best decisions on how to manage their land for water quality and for profitability.

By filling out this application, you are enrolling into the “Water Quality and Profitability Review” program with Polk SWCD to review farming and land-use practices on your property. The goal of the program is to provide suggestions on alternative farming and land-use practice that may positively influence water quality and profitability.

This program is currently available to farmers in Polk County.

Responsibilities and expectations: The staff at Polk SWCD will be responsible for:

- 1) Keeping all correspondence and data private.
- 2) Providing a list of reasonable expectations and deadlines,
- 3) Using current and vetted techniques to perform the farm evaluation.
- 4) Providing a succinct report of findings along with recommendations and funding sources that would be valuable to implement any changes.
- 5) Ongoing support to implement changes to improve water quality and profitability.

Completion of this application gives Polk SWCD the ability to contact you about whole farm water quality planning and profitability planning.

The data collected during this program will be confidential and only be used to support decision making within this program.

Please fill out this form and email it to Michael.James@ia.nacdnet.net with the subject line “**PG application last name**”, or submitting in person to 1513 Ankeny Blvd. Ankeny, IA.
