of Iowa

Sponsors & Vendors

Conservation Partners

Field Day Agenda:

- Introduction to Humic and Fulvic Acids
- Is it Really Regenerative Farming Without Livestock?
- How to Test New Farming Methods on Your Own Operation
- Explore Available Cost Share Programs & Technical Assistance

Presentations

Meet Candy Thomas, Soil Health Specialist with Soil Caretaker Services LLC. When we hear about regenerative farming practices, we often hear about the need for livestock. So: *Is it Really Regenerative Farming Without Livestock?* Join us to find out.

Join retired USDA-ARS Research Professional, Dana Dinnes, to dig in to how Humic and Fulvic acids can work for you.

Meet the Practical Farmers of Iowa Research Director, Stefan Gailans, who will be discussing farmer led research and how to start conducting trials on your own farm.

Enjoy refreshments while learning about available cost share opportunities and our free technical assistance. Door prizes will be drawn at the end.

LUNCH IS ON US >>> RSVP by July 6th on our website at:
<https://www.polkswcdiowa.gov/rooted-resilience>
